EXPERIENCE

Yardi Software Pvt. Ltd.

Software Engineer, Full Time

August 2018 – present

Pune, IN

Development Projects:

- Implemented Y2Y conversion process for Resident and Marketing cycle for existing Yardi clients to ease up the prior standard ETL conversion process. Outcome : Reduction in the manual efforts of executing the script for each ETL task implying reduction in total duration of conversion by 50%.
- On-boarding of SeniorCRM clients on leasing workflow with main aim of providing custom Lease and Quote sheet services for the client.
- Implemented automation for regression process using vb.net over ySelenium and .net framework for,
 - Yardi SeniorCafe : Resident cycle and Payment process
 - Yardi SeniorEHRx : Health Care and vitals
 - Yardi SeniorCRM : Assessments
- Worked on the ETL conversion for 25+ clients Resident & Marketing cycle. Responsibilities included data extraction from source client, data restore, extracting unmapped mappings, data review and extracting data and import.
- Developed a package creation tool, utilised for maintaining consistency with the custom table by providing custom table schema packages which also provided reusability.

Services :

- Maintenance: Maintenance activities for automation projects. Deploying updates on the production followed under Continuous Integration.
- Production data issue resolution : Reproducing data issues reported by client and providing solution or fixes for the same.
- Provide enhancements and modification for the add-on features at Leasing workflow, which included working on cases, CPR.

Personal Project

Personal static portfolio :

- Created a person portfolio and hosted it over github. Link on top left corner.
- Technology used : HTML, CSS, JavaScript

Tambola Tracker :

- Developed Tambola Tracker an android application to track the game for organising team. The features integrated include - managing participant's tokens, tracking transactions & managing the database for the same.
- Technology used : Android Studio using Java and SQLite.

Certification :

- 'AWS Fundamentals: Going Cloud-Native' certification by Coursera.
