EXPERIENCE

Yardi Software Pvt. Ltd.

Software Engineer, Full Time

August 2018 – present

Pune, IN

Development Projects:

- Implemented Y2Y conversion project for Resident and Marketing cycle for Yardi clients, to ease up the prior time consuming process using ASP.NET Web Forms. Outcome : Reduction in the manual efforts of executing the script for each ETL task, implying reduction in total duration of conversion by more than 35%.
- On-boarding of SeniorCRM clients on leasing workflow which featured creating custom Lease and Quote sheet for the client based on the proposals which also featured Signature Pad for virtually signing the lease.
- Implemented automation to perform regression testing on below mentioned products using VB.NET over ySelenium, NUnit2 and .NET framework,
 - Yardi SeniorCafe
 - Yardi SeniorEHRx
 - Yardi SeniorCRM
- Worked on the ETL conversion for 25+ clients on both Resident & Marketing cycle. Responsibilities included data extraction, data restore, extract mappings, data review and data transformation and import.
- Developed a package creation tool, utilised for maintaining consistency with the custom table by providing custom table schema packages which also provided reusability.

Services :

- Maintenance: Maintenance activities for automation projects. Deploying updates on the production using Continuous Integration process at TFS .
- Production data issue resolution : Reproducing data issues reported by client and providing solution or fixes for the same.
- Provide enhancements and modification for the add-on features at Leasing workflow, which included working on cases, CPR.

Personal Project

Personal static portfolio :

- Created a person portfolio and hosted it over github. Link on top left corner.
- Technology used : HTML, CSS, JavaScript

Tambola Tracker :

- Developed Tambola Tracker an android application to track the scoreboard for organising team. The features integrated include - CRUD operations, managing token for participant & tracking transactions.
- Technology used : Android Studio using Java and SQLite.

Certification :

- 'AWS Fundamentals: Going Cloud-Native' certification by Coursera.
