EXPERIENCE

Yardi Software Pvt. Ltd.   August 2018 – present
Software Engineer, Full Time   Pune, IN

Development Projects:

- Implemented Y2Y conversion process for Resident and Marketing cycle which eased the prior conversion process and turned out to be a time saving approach.
- Automation for regression process using .Net framework and ySelenium framework for the following real estate management products,
    - Yardi SeniorCafe
    - Yardi SeniorEHRx
    - Yardi SeniorCRM
- On-boarding: Leasing workflow on-boarding for the SeniorCRM clients. Provided custom Lease and Quote sheet service for client.
- Developed a package creation tool - utilised for creating custom table schema packages, providing reusability and consistency for custom tables at the database.
- Worked on the ETL conversion for 25+ clients which required performing the task of data extraction from source client, gather the unmapped mapping for it and importing data on target client.

Services :

- Maintenance: Maintenance activities for automation projects. Deploying updates on the production.
- Production data issue resolution : Analyse data issue reported by client and deliver fixes.
- Provide custom scripting services for leasing projects

Personal Project

Tambola Tracker :

- Developed an android application to track the game of Tambola for organising team. The features integrated include - incorporating new participant's ticket, tracking transactions & managing the database for the same.
- Technology used : Android Studio using Java and SQLite.

Other Project :

- Digital Advertisement Generator - A web application to create advertisement & store data. Analysis of click rate by applying knowledge of JavaScript
- Technology used : HTML5, JavaScript and CSS3.

Certification :

- 'AWS Fundamentals: Going Cloud-Native' certification by Coursera
